

BERKE ALPASLAN

Manavgat, Antalya, Turkey | +90 537 391 4979 | alpaslanberke@gmail.com

LinkedIn: linkedin.com/in/berkealpaslan | GitHub: github.com/BerkeAlpaslan

PROFESSIONAL SUMMARY

Fourth-year Computer Engineering student with strong expertise in ASP.NET Core, modern software architecture patterns, and backend development. Gained hands-on experience developing a complete backend system from scratch at SednaCloud. Proficient in Onion Architecture, CQRS, and clean code principles with practical implementation experience. Seeking mandatory internship opportunity for February-June 2026 period.

EDUCATION

Bachelor's Degree in Computer Engineering

Manisa Celal Bayar University | Manisa, Turkey

September 2021 - June 2026 (Expected) | GPA: 3.45/4.00

Current Coursework (Fall 2025):

Machine Learning, Advanced Computer Networks, Computer Network Programming, Biologically Inspired Algorithms, Software Engineering, Graduation Project

Core Courses:

Data Structures & Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming & Design, Computer Networks, Microprocessor & Embedded Systems, Parallel Programming, Artificial Intelligence, Natural Language Processing, Python Programming

TECHNICAL SKILLS

Programming Languages:

C#, Python, Java, TypeScript, Assembly

Frameworks and Technologies:

ASP.NET Core, Entity Framework Core, Angular, PostgreSQL, Microsoft SQL Server, Redis, RabbitMQ, gRPC, Docker, Postman

Software Architecture and Design Patterns:

Onion Architecture, Clean Architecture, CQRS Pattern, Mediator Pattern, Generic Repository Pattern, Dependency Injection, Object-Oriented Programming, Concurrent Programming

Development Tools and Methodologies:

Git Version Control, RESTful API Design, Agile Project Management, Code Review, API Testing

Networking and Systems:

Computer Network Design, ICT Communications Protocols, Network Routing

WORK EXPERIENCE

Software Engineering Intern

SednaCloud - Kod Yazılım Proje Hiz. Tur. Tic. A.Ş. | Antalya, Turkey - July 2024

- Designed and developed a production-ready backend system from scratch for hotel reservation platform
- Implemented Onion Architecture and Clean Architecture principles using ASP.NET Core
- Built maintainable and scalable code structure with CQRS and Mediator patterns
- Integrated PostgreSQL database using Entity Framework Core
- Established clean code architecture with Generic Repository and Marker Pattern
- Collaborated with cross-functional teams in Agile methodology environment
- Completed backend API integration with Angular-based frontend
- Gained practical experience in RESTful API design and Dependency Injection

GitHub: github.com/BerkeAlpaslan/SednaReservationAPI

PROJECTS

Hotel Reservation System Backend

ASP.NET Core, PostgreSQL, Docker, Entity Framework Core

- Developed production-ready hotel reservation backend system with monolithic architecture
- Applied Onion Architecture and Clean Architecture principles
- Created clean code structure with CQRS, Mediator Pattern, and Generic Repository Design Pattern
- Integrated Entity Framework Core with PostgreSQL on Docker

GitHub: github.com/BerkeAlpaslan/SednaReservationAPI

Ferry Tour Multi-Threaded Simulation

C, Multi-Threading, Concurrency

- Developed multi-threaded simulation of ferry transport system for cars, minibuses, and trucks
- Designed concurrency mechanisms to synchronize four toll booths, vehicle queuing, and ferry loading/unloading
- Prevented race conditions and managed shared resources using mutex and semaphore

GitHub: github.com/BerkeAlpaslan/FerryTour

Real Estate Price Prediction - Machine Learning Project

Python, Machine Learning, Data Analysis

- Developed machine learning project to predict price per square meter by scraping data from "emlakjet.com"
- Implemented data collection, processing, and prediction model creation using Python

GitHub: github.com/BerkeAlpaslan/RealEstatePricePrediction

LANGUAGE SKILLS

Turkish: Native

English: B2 (Business English - Listening, Reading, Writing, Speaking)

German: A2 (Basic Level)
